DETAILED ACTION

Applicant has canceled claims 4 and 10.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5-9,11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Clauberg et. al., U.S.P. No. 5,463,705.

Clauberg et. al. 705' teaches (Figs.1-16) a magneto-optic device and method of making same comprising: a magneto-optical waveguide core 10 doped with ferroelectric materials, including iron, so as to increase magneto-optical activity which is placed between two cladding regions 11 and 12 wherein the device includes semiconductor alloys like InP, GaAs and GaInAsP , which clearly, fully meets Applicant's claimed limitations.

A copy of PTO-1449 will be included in this office action.

Response to Arguments

Applicant's arguments with respect to claims 1-3,5-9,11 and 12 have been considered but are moot in view of the new ground(s) of rejection.

Because the new grounds of rejection was not necessitated by Applicant's amendment, this office action has not been made final.

The following references are also cited by the Examiner as being pertinent prior art: Dammann et. al., U.S.P. No. 4,746,182 (Figs.1-4) and Levy et. al., U.S.P. No. 5,408,565 (Figs.1-6).
